

Rolls-Royce Retirement Savings Trust (RRRST)

We've expanded your choice of investment funds from April 2025

We're introducing the building blocks of our award-winning Target Date Funds (TDF) investment solution

In the TDF (the Savings Trust's current default investment solution), investments are automatically balanced across two multi-asset investment funds - one growth focused, the other retirement focused. The allocation between these two funds depends on how close a member is to their selected retirement age.

You now have the option to invest some or all of your retirement savings in the building blocks of the TDF. These investment funds are called:

- Av MyM BlackRock Growth Fund
- Av MyM BlackRock Retirement Fund

We're adding the option of overseas bond exposure

You now have the option to invest some or all of your retirement savings in these two passive investment funds:

- Av MyM BlackRock Overseas Government Bond Index Tracker Fund
- Av MyM BlackRock ESG Overseas Corporate Bond Index Fund

Find out more...

To see our refreshed investment fund range, please head to the updated [Guide to your Rolls-Royce Retirement Savings Trust](#) and go to the Your Choice of Funds section that starts on page 29.

Here you'll find all of the self-select investment funds offered by the Savings Trust and the charges that apply. By clicking on the name of the investment fund, you can see its Fund Factsheet, which provides more information about the fund, including past performance. The guide also provides lots more information about the Savings Trust, along with details of our default investment solution.

You can make changes to your investment choices at any time online through the [Aviva MyWorkplace website](#) or app. Alternatively, you can contact the Savings Trust administration team at Aviva on 0345 604 0803.
